WEBSHOP

Did you know that we have
our own **B2B webshop**?

Check out the Capi collection!

SHOW HOW IT'S DONE.

Big stories? We hear those often enough. So let's keep it short.

We are Capi, and we are working for a greener life for everyone;
with everyone.

Sit back and wait for a better world? We don't do that.
We put things in motion.

Whether our products are beautiful?
You decide that for yourself. We'll take care of the rest.
And with the rest we mean products of high and lasting quality:
weatherproof, inspiring and with designs and colours for everyone.

With each of our pots fits a plant, garden, interior, terrace or balcony.

New life grows and blossoms from those pots.
Let's make sure products no longer stand in the way of new life.

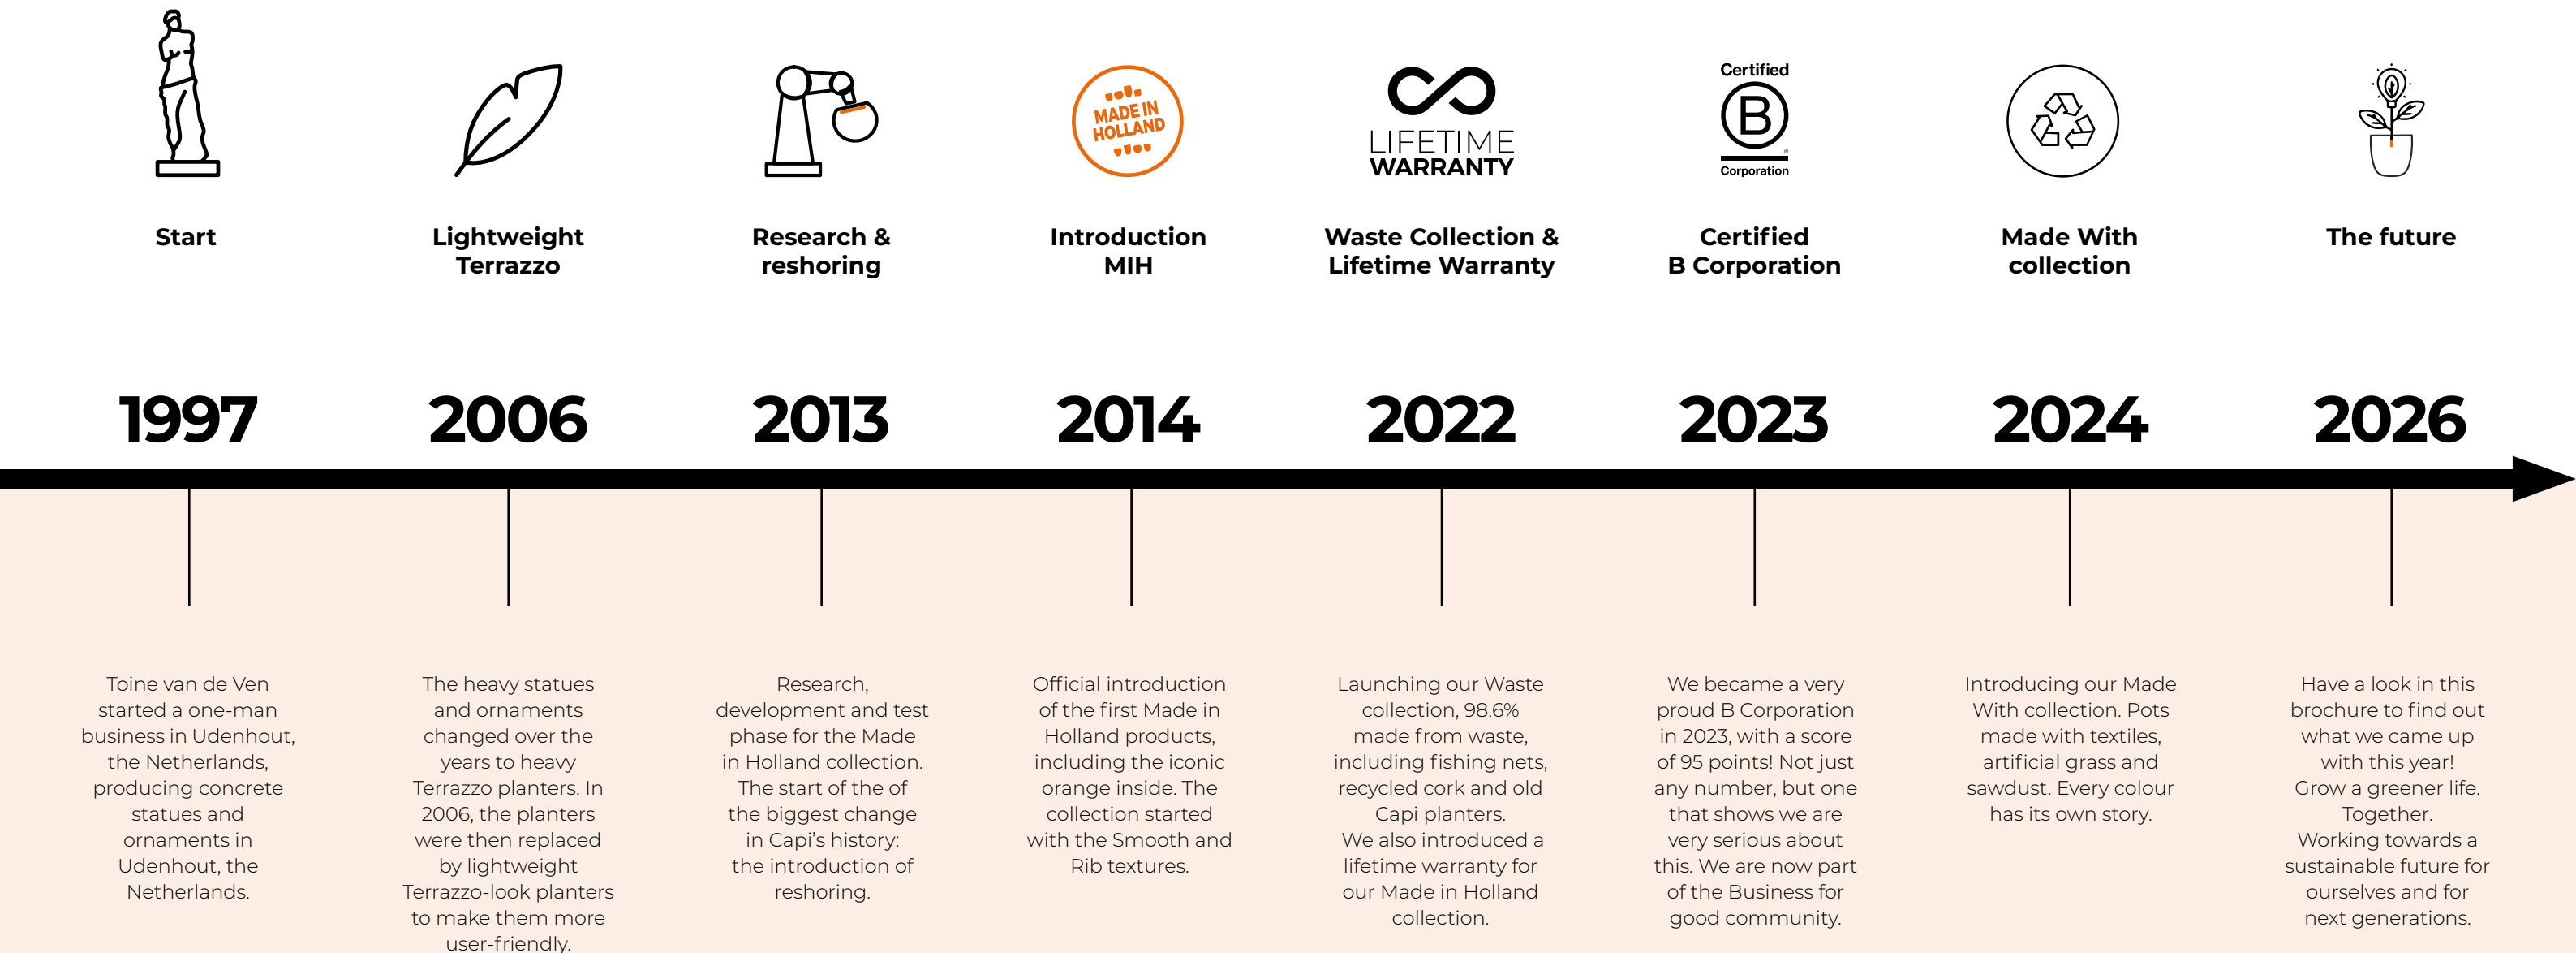

Capi pots are for a new generation; new life grows and blooms here.

Grow a **greener life.**
Together.

Check our [brand movie](#).

Let's dive into the history of Capi...

Behind the planters, there is a story that begins in 1997. Over 25 years ago, Toine van de Ven started a one-man business in Udenhout, the Netherlands. Toine would have never imagined that delivering heavy sculptures would become the preliminary stage for the products available today. These days honesty and certifications are very important to us. We do not only want to show, but also prove, how it's done!
It is not without a reason our mission is: 'Grow a greener life. Together.' And this is just the beginning!

The journey from powder to pot.

Capi Europe has developed its own rotation moulding method for the production of Made in Holland pots. We are unique throughout the world in using this particular rotation moulding technique. With this process we save up to 80% of the energy compared to traditional rotation moulding.

01
Raw material
A mixture of polyethylene made with recycled material and PEFC certified wood fibres forms the basis of our pots.

02
Big bags
The raw material hangs in big bags. Each big bag contains its own colour.

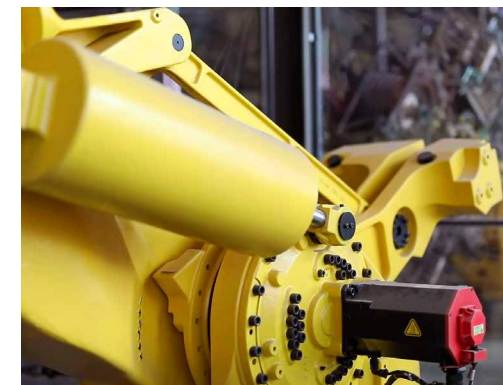

03
Filling system
The raw materials are automatically poured into the mould, using a filling system.

04
rotational moulding
The mould is heated in order to melt and liquefy the powder. The machines spin around so the mixture is distributed throughout the mould. The substance is then cooled to produce the flower pot.

05
Orange inside
The two layers of the pot (outer layer and insulating layer) are made in a single cycle.

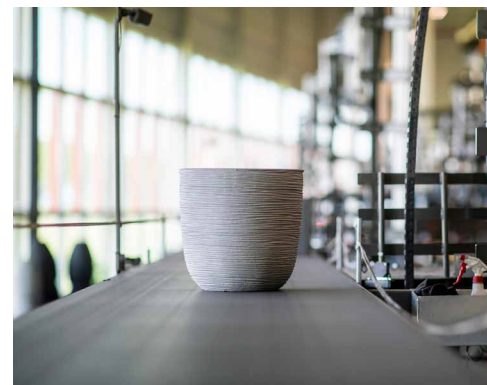

06
Moulds
Each pot model, texture, and size has its own mould.

07
Day & night
Our Capi robots work 24 hours for 5 days a week.

08
Mould to belt
As soon as the robot is finished, the pot will automatically be taken to the conveyor belt.

09
Conveyor belt
The conveyor belt takes the pot to the finishing and painting area. First stop: scanning station.

10
Scan station
At the scanning station, the pot is recognised by multiple cameras. The rest of the robots of the finishing line now know what to do with the pot.

The journey from powder to pot.

Want to see this process in action?

Watch [this](#) video about the journey from powder to pot!

11 Finishing robot

The second robot removes the sharp edges in the pot.

12 No waste!

The edges coming off the pot will go into our own shredder. This means there is no waste during our whole production process.

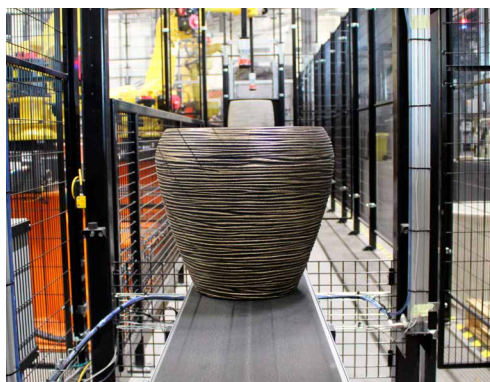

13 Back to the roots

The material coming from our shredder goes back to our supplier. There they will be used for new materials.

14 From stage to stage

A small conveyor belt transports the pot from stage to stage. Every stage has its own robot that takes the pot from the belt into a specific cell. If the pot does not need to be painted, the conveyor belt will take it directly to the end of the belt.

15 End of the belt

There it is, a freshly painted or non-painted pot ready for the last step.

16 The last step

The last step: a Capi label and a pot card. The pot is now completely finished and ready to hit the stores!

Capi Headquarters in The Netherlands.

Built in 2017, our modern headquarters in Tilburg is designed to inspire. With large glass walls and plenty of natural daylight, the layout creates an open and transparent work atmosphere. But there's more than just office space. Our building also houses our own production hall and warehouse. This warehouse has space for 20,000 pallet places and from here we transport our pots to more than 80 countries worldwide.

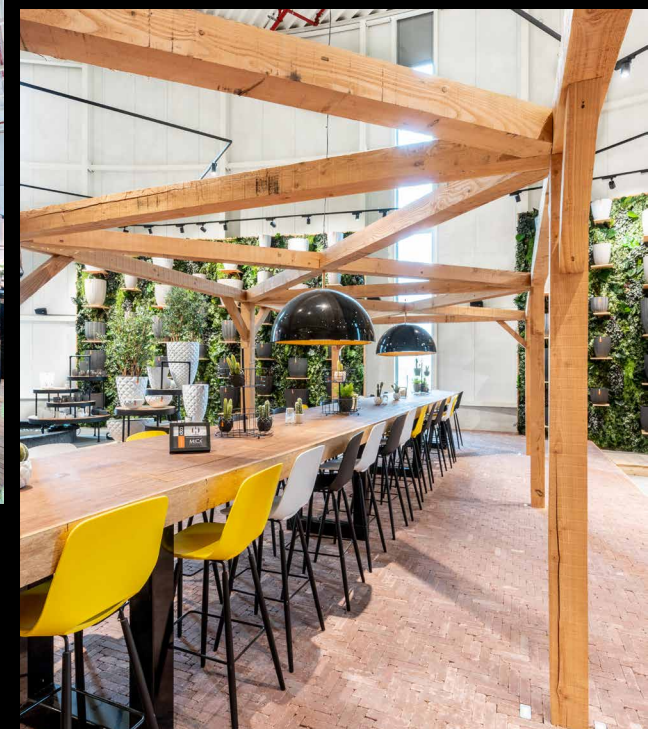

Inside the production hall, 18 robots work 24 hours a day, 5 days a week to produce our pots. Powering it all? The 7,850 solar panels on our roof, generating enough electricity to supply 900 households.

To top it off, we even have our own gym, and our office dogs Mosey and Loui, bringing fun and energy to the team every day!

Want to see it with your own eyes? You are more than welcome to visit!

Are you ready for the **Capi Experience**? Step into our 2,000 square meter showroom and experience the full Capi story. From our design pots to our rain barrels. This inspiring, green space brings our collection to life and offers a behind-the-scenes look at our production process, materials, collections and mission.

Did you know... You can also rent the Capi Experience for your own event or meeting? With our own theatre featuring 150 seats and projector screen, a bar, a large meeting table for 40 people and a smaller meeting room with TV screen, our showroom is perfect for events, meetings or presentations in an inspiring setting!

With the **orange interior**•

The orange interior.

Our well-known Made in Holland collection is produced in our factory in Tilburg. We manufacture high quality flower pots which are which are 100% recyclable and come with a lifetime warranty. All Made in Holland pots feature an orange interior. The orange inside is a recognisable feature of our brand. Here's why:

Made in Holland.

The orange interior is a nod to our Dutch production. Around the world, the colour is recognized as the national colour of the Netherlands.

Insulating layer for plants.

The orange inside is actually a second layer that acts as an insulating layer. It protects the plant's roots against cold in winter and heat in summer.

Extra strength.

The orange layer also makes the pot extra strong. And that makes it fracture-resistant.

The symbol for reshoring.

More than 10 years ago, we brought production back to the Netherlands, a move also known as reshoring. This choice allows us to guarantee better quality, improve our production processes and reduce our ecological footprint.

Made in Holland collection.

Arc Granite

The Arc Granite collection, a series of eye-catching models with sizes ranging from XS to XL (up to 177 cm). This collection is perfect for projects, entrances, and any outdoor area where you desire a touch of flair.

The Arc Granite collection is inspired by contemporary architecture. The planters are **100% watertight** and therefore suitable for indoor use. For outdoor use, you only have to drill a few drainage holes of 25 mm in the bottom to make sure the water can find its way out of the planter.

Our Arc Granite planters are produced in India with a strong focus on durability and sustainability. The production is powered by **solar energy** and the pots are **made with recycled materials**, including milk pouches and post consumer plastics. The black planters are even made with **98% recycled materials**! On top of that, this collection is **100% recyclable**.

Capi for **biodiversity**•

38

Biodiversity collection

Our rain barrels come with a planter on top.

All our rain barrels are provided with a **luxurious metal tap** including garden hose connection!

The climate is changing and the weather is becoming more extreme. To help maintain a water friendly garden, we have developed several design rain barrels.

By collecting rainwater, this precious resource can be stored and utilized for your garden's irrigation needs. You can nourish your plants with this natural source, reducing the need for tap water consumption. This not only minimizes the strain on local water supplies, but also saves money on water bills.

With a variety of sizes, there is a perfect fit for everyone's needs. Additionally, with two colours and two textures available, you can choose a design that complements your preferences and seamlessly integrates into your garden.

All rain barrels come with a planter on top. This way you can add some extra green to your garden. Fill the planter with some flowers that attract birds, bees or butterflies to boost biodiversity in your garden.

Did you know... Rainwater is better for your plants than tap water, because it contains less lime !

The bird houses attracts different bird species.
The information below is based on European bird species:

Bird house 1		Bird house 2
Blue Tit	Nuthatch	Common redstart
Pied Flycatcher	House Sparrow	Pied flycatcher
Crested Tit	Tree Sparrow	Starling
Great Tit		Tree sparrow

The gardens all around the world are consisting more and more of stone. This means insects and birds have less space for natural nesting and hiding places.

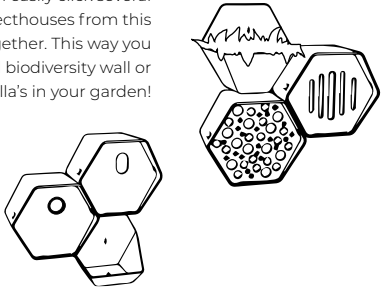

To help preserve and restore, we have designed a range of bird- & insect houses for your garden or outdoor space. From providing nesting sites for birds to creating habitats for butterflies and essential pollinators like bees, these houses play a vital role in supporting biodiversity.

Available in two shapes and three colours, green, brown and anthracite, these houses seamlessly blend into natural surroundings while providing a safe haven for various species.

This collection is made from 98% recycled materials.

The Hive models have a **click & combine** clip on the back. With this clip you can easily click several bird- or insecthouses from this collection together. This way you can create a full biodiversity wall or some bird villa's in your garden!

Made with **recycled materials**•

NEW
TEXTURE

This indoor collection features pots **made with recycled materials**, crafted through injection moulding. Each pot tells a story of transforming a residual waste stream, for example used textile, into something beautiful.

This year we introduce a new texture to this collection: **Skin**. This texture is available in **3 colours and 3 sizes**. We also added a **bigger size (ø 28)** and a **new colour** to the groove structure: **Grey**, made with recycled textile.

These pots are suitable for different plants and spaces, providing endless possibilities for adding green in your home or office. You not only enhance your indoor spaces but also contribute to the reduction of waste.

Easily use outdoor planters indoor with an insert pot

Due to the wheels under the trolleys, they are movable in all directions.

The plant stand is suitable for the Made in Holland planters in the sizes 882 and 883.

Place the drainage cap over the (drilled) drainage hole on the **inside** of your planter. This prevents the hydro grains to fall out of the drainage hole.

Accessories

The accessories have been added to our collection to increase the ease-of-use of our products. Various products that will help consumers embrace the green lifestyle, in a pleasant and easy way.

Shelf plans in your store.

For our customers we can provide customised shelf, floor, and store plans. We combine this with our Point of Sales materials and customized signing. This way you can provide the right information to your customers together with inspiration through lifestyle images. Thanks to our experience and product knowledge we can help you with the best product presentations.

Outdoor corner

Indoor corner

Grow a **greener life.**

Capi corner

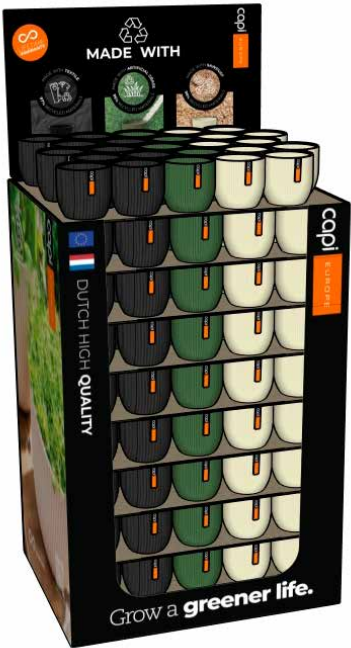

To help you setting up the perfect Capi corner in your garden centre, we can create a store plan together. We will combine shelf plans and floor presentations with pot-plant corners to create a full Capi Experience. The combination of our indoor & outdoor collection, our rain barrels and biodiversity products together with plant tables ensure a green oasis in your store.

Please contact us for the options in your store.

Warranty & service.

5 YEAR WARRANTY 10 YEAR WARRANTY ∞ LIFETIME WARRANTY

Every single Capi product comes with a warranty. Our Made in Holland, Made with and Arc Granite collections come with a **lifetime warranty** on manufacturing defects when the products are being used properly. We are proud to offer a lifetime warranty on these products to show you that we believe in their quality. We live in a consumer society where we of course want to sell as many pots as we can. However, we don't want people to buy a pot, just use it for a few years, throw it away, and buy a new one. We would like to make sustainable design pots that last a lifetime!

The rest of our collection comes with a **5 or 10 year warranty** on manufacturing defects. These warranty rules only apply when the products are being used properly. Every product has its own label that shows the warranty period for that specific product.

If anything happens to a Capi product when it is in use, or when a customer comes back with a complaint about a product, please do not hesitate to contact our service department. We are happy to help you. Please visit capi-europe.com/en/guarantees/, fill out the form and we will make sure you will be assisted as soon as possible.

It will be very helpful if you would describe and attach the following:

- Description of the complaint.
- Type of product and size.
- Photos of the product and their defect.
- Purchase receipt.

Filling tip.

1. Choose an impressive plant.
2. Fill the planter for 1/3 with hydro grains.
3. Fill the planter for 2/3 with soil.
4. Put your impressive plant in the soil.
5. Enjoy the growth.

Outdoor use? Please drill a 25mm hole to ensure water drainage and place our drainage cap on top (see page 67).

Our warranty rules apply when our products are being used properly. There are some things to keep in mind when using a planter;

- Planters need a drainage hole when being used outdoors. This allows the roots of the plants to breathe and it makes sure the water can drain off. This drainage hole also makes the planter frost-resistant. In addition, it is important that the pot is kept off the ground in frosty conditions. If the pot has a flat bottom, it can be placed on pot feet or a trolley.
- Make sure the drainage hole is at least 25mm, otherwise it may be clogged by the hydro grains in the pot. If the pot doesn't have enough drainage, the plant will be standing in too much water for too long (and the pot won't be frost-resistant). Poor drainage can also cause calcification on the outside of the pot. This is easy to clean, but even easier to prevent with a good drainage.
- When the pot is filled, it is less easy to move it because of its weight. Therefore, find a suitable spot in advance. If you do want to move the pot (e.g. because plants have to go inside during the winter), preferably use a trolley or lift the pot at the bottom with two people. Do not lift the pot by the edges, but at the bottom. The edges are no longer fracture-resistant when the pot is fully filled, because of the weight.
- Not all plants are suitable for pots. Our pots are only fracture-resistant if the potted plants and their roots remain in proportion. Plants with fast-growing roots, create increasing pressure and are not suitable for placing in flower pots. These include tree species, fast-growing plants and, for example, bamboo. These plants are mainly suitable for placing in the ground. If you want to put them in a nice pot, make sure you regularly repot them to a larger pot. If in doubt, always contact our service department or ask for advice in the garden center.
- Make sure the plants are in proportion with the planter you place them in. If the plant is too big or too high the plants probably do not have enough space to grow, and the pot probably can't hold the plant, in gusts of wind for example, because the pot is not heavy enough to stay upright.
- A flowerpot can always get dirty, especially if it is outside. The flower pots can easily be cleaned with a soft brush or cloth, possibly with some warm water and a little detergent. For shiny flower pots, preferably use a soft cloth to avoid scratches. Do not use high-pressure cleaners, caustic/abrasive products or products with chlorine/ other bleaching agents.

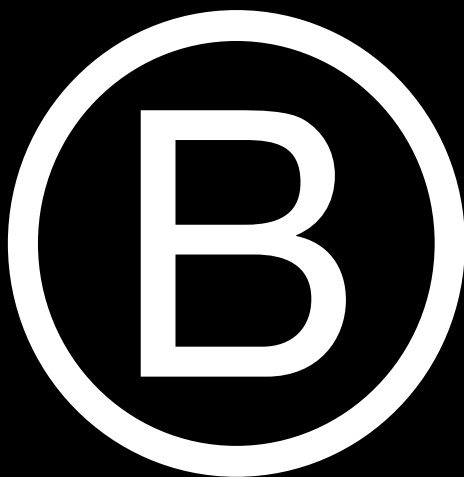

Feel free to contact our service department if you have any questions.

Happy to help.
